The new pricing system  
for surface coating

***Dear Customer,***

The completion of our new horizontal and vertical coating plant — and the implementation of a laminating facility at the GUTMANN Bausysteme GmbH site in Weißenburg — mark a significant expansion of our production depth.

As a customer, you will now benefit not only from a drastic reduction of our delivery times for the surfaces we do not keep in stock, but also from a transparent price structure for surface finishes. In this context, we have introduced a new billing model, which we would like to present to you on the following pages.

Yours sincerely  
The GUTMANN Bausysteme GmbH Team

## Absolutely transparent Differentiated

- Differentiated calculation by material and surface.
- Price variations within the surface costs are considered independently from the material.
- Assignment of the surface to price groups according to actual manufacturing costs and not surface characteristics such as "Structure" or "Gloss level".
- All coating surface specifications include the powder manufacturer and powder number.
- Different product groups (profiles, windowsills, small parts) have different basic prices (€/m<sup>2</sup>).
- Order size: the surfaces of all articles to be coated with the same powder number are added together.
- The larger the total coating surface, the lower the surcharge.
- Any minimum coating cost surcharges are offset against the actual coating costs.

## Calculation made easy

- No more searching through price lists, no more calculating coating costs by hand or waiting for quotations.
- Simply use our online portal tuulo: **24 hours a day, 7 days a week**
- Go to tuulo.de. to create your own demo version access.
- All functions can be used after activation of the ordering process.
